EIGER 200

Pop-Up Products Limited is an award winning, independent company, solely engaged in the development and supply of quality access products and solutions for over 30 years

Eiger 200 folding tower provides instant access to a platform height of 1.8m with a folding base unit. It has a frame width of 680mm with variable height increments.

Its innovative compact design means that it can be carried through doorways and easily transported

Eiger 200 complies with The Work at Height Regulations 2005. All equipment is manufactured under BS EN ISO 9001:2008
