

Targeted annual reduction

Scope 1

Our near-term scope 1 target is to reduce our scope 1 emissions by 42% from our baseline year by 2030. To reach this target we will need to reduce emissions by ~0.2 tCO₂e each year.

Projected Scope 1 Reduction to 2030 (tCO₂e)

Targeted annual reduction

Scope 2

We are aiming to reduce our location-based scope 2 emissions year-on-year and to reduce our market-based scope 2 emissions by to zero by 2030. In order to reduce location-based emissions we are implementing a range of energy efficiency measures to reduce energy demand where possible, these are discussed in more detail later in this report.

To reach our market-based target, we will need to increase renewable energy consumption to 100% before 2030 by procuring renewable energy backed by Renewable Energy Guarantees of Origin (REGO) certificates.

Targeted annual reduction

Scope 3 target

We are aiming to reduce our scope 3 emissions by 42% from our baseline year by 2030. To reach this target we will need to reduce our scope 3 emissions by ~208.98 tCO₂e each year.

Projected Scope 1 Reduction to 2030 (tCO₂e)
